

# Monthly Health Screen

Second Tuesday of every month

7:30-10:30 a.m. (no appointment necessary)

**REDUCED CASH PRICE**

**Glucose** \$5.00

Test for blood sugar to detect pre-diabetes or diabetes

\* Fasting Glucose - do not eat or drink anything with sugar for 6 hrs prior to testing

\* 2 hr. Glucose - to be drawn 2 hours after meal with sugar

**Cholesterol** \$10.00

**Cholesterol & Triglyceride** \$15.00

\* Total Cholesterol measures all types of cholesterol

\* HDL-Cholesterol measures the "good" or beneficial cholesterol

\* LDL-Cholesterol measures the "bad" or non-beneficial cholesterol - a risk factor

\* Triglycerides - another type of lipid or "fat" that can contribute to artery disease

**Lipid Panel** \$25.00

Tests include Total Cholesterol, HDL-Cholesterol, Triglycerides & a calculated LDL-Cholesterol used for assessing coronary artery disease risk and assessment of therapy for patients on lipid lowering medication

**Thyroid Profile** \$30.00

Tests include T3-Uptake, T4, and TSH - hormones that affect thyroid function.

Thyroid hormones affect total metabolism and can be increased or decreased requiring treatment.

**T3, T4 or TSH** \$10.00 each

TSH is first step in assessing thyroid function

**PSA** \$30.00

Prostate Specific Antigen - a tumor marker for prostate cancer used in screening for prostate cancer and monitoring treatment

**CMP** \$79.00

Comprehensive Metabolic Panel - checks the body's fluid balance, levels of electrolytes like sodium and potassium, and how well the kidneys and liver are working

**CBC** \$33.00

Complete Blood Count - checks the level of different types of cells in the blood; red blood cells, white blood cells and platelets

**Glycohemoglobin** \$35.00

Hemoglobin A1c- checks the amount of sugar (glucose) bound to the hemoglobin in the red blood cells

**BMP** \$58.00

Basic Metabolic Panel - checks the body's fluid balance, levels of electrolytes like sodium and potassium, and how well the kidneys are working

**Liver Panel** \$50.00

Liver Function Panel - checks for liver injury, infection, or disease
